

The image shows a close-up of a grey motor unit for window blinds, with a yellow cylindrical component. A yellow callout box at the top contains the text 'AM25 PLUS L USB'. A yellow line points from this box to the motor unit. Another yellow callout box on the right contains the text 'USB Type-C charging' and points to a USB-C port on the motor unit. The background is a blurred view of window blinds.

AM25 PLUS L USB®

USB Type-C charging

Wireless: motorization of blinds, perfected

Thanks to its wireless installation and rechargeable battery, you reduce costs and labor. But it's its connectivity that takes the motorization of the AM25 to the next level.

A-OK®

a-okmotors.com

A complication-proof design.

Elevate. Control the light.

Thanks to its easy recharge via magnetic USB C and its internal lithium battery, the AM25 PLUS L USB® is the most convenient alternative for motorizing roller blinds.

Limitless motorization: the absence of an electrical supply point is no longer a problem. With a charging time of 6-8 hours using the USB C charger (5V 1A), we achieve a blind autonomy of up to 6 months. Its magnetic charging adapter practically connects itself, making recharging even easier. Its connection to the A-OK App is intuitive and fast.

Almost imperceptible

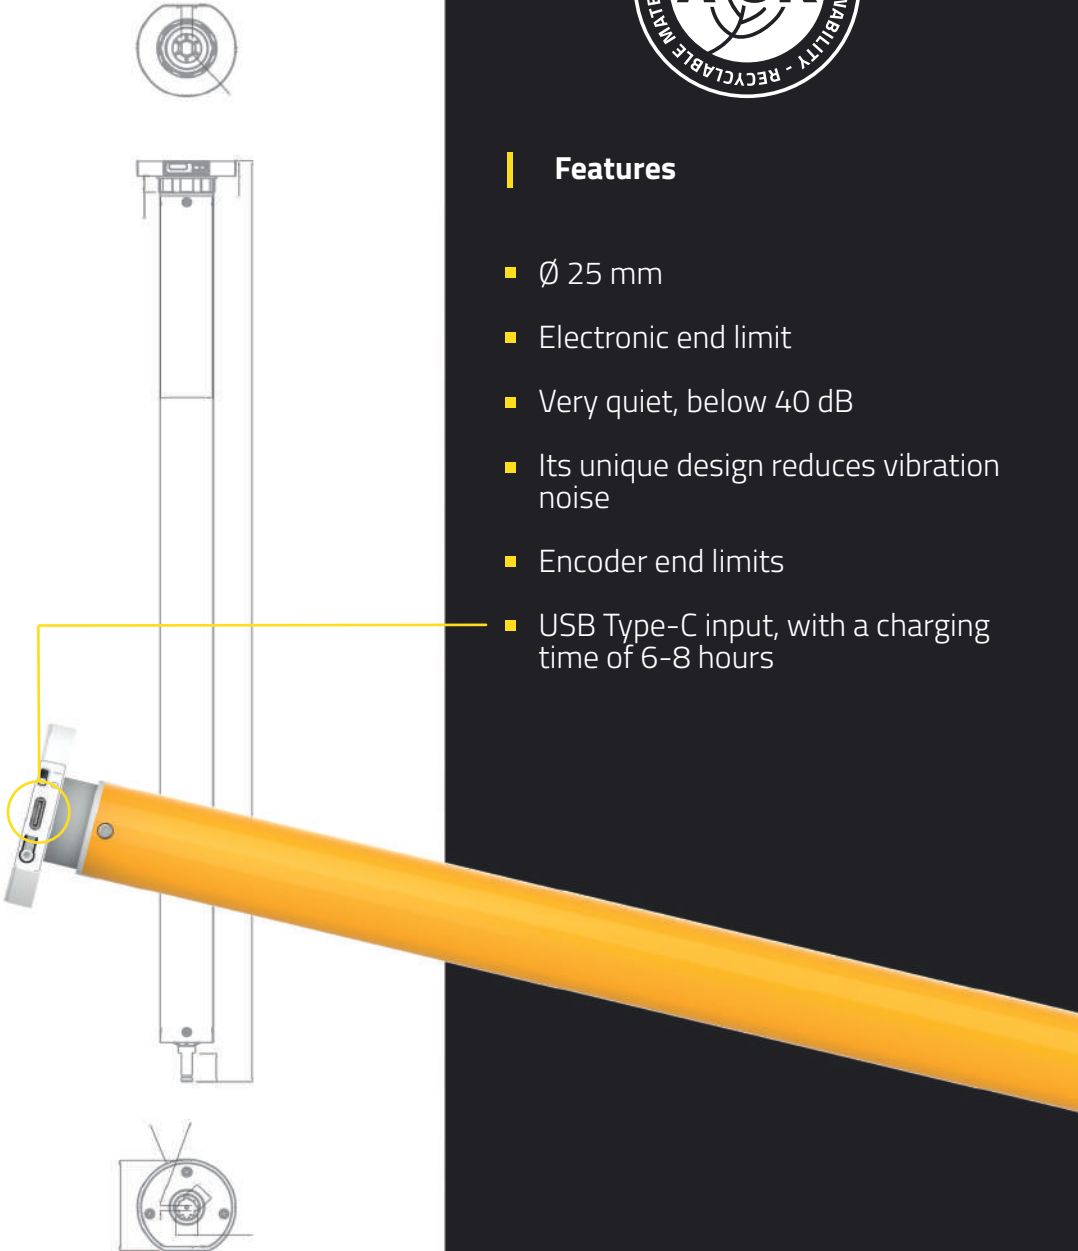

The elegance and characteristic sobriety of the blinds are complemented by A-OK's patented noise and vibration reduction technology. With a sound below 40dB, the AM25 PLUS L USB® adds extra comfort to any space.

Features

- Ø 25 mm
- Electronic end limit
- Very quiet, below 40 dB
- Its unique design reduces vibration noise
- Encoder end limits
- USB Type-C input, with a charging time of 6-8 hours
