Accessible, easy and safe motorisation

Install the future thanks to the **AM45 BASIC AUTO®**

Creating smart spaces is now safer and more efficient than ever thanks to the **AM45 Basic Auto®**. Our most complete tubular inverter motor, with electronic end limit and obstacle detection, is the most efficient solution to automate any installation.

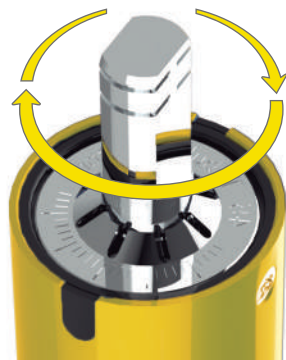

Simple and outstanding

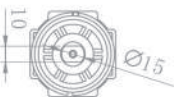

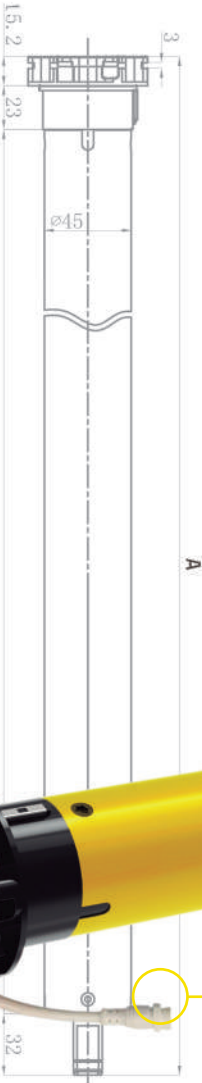

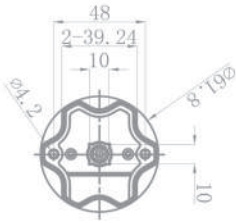

From rollable blinds to vertical awnings, and suitable for high locations, the **AM45 Basic Auto®** motor offers all the security of obstacle detection. Thanks to the special **EASY CONNECT®** cable, replacing the motor could not be easier. Its end limit programming is very intuitive, whether manually through the inverter or automatically by pressure. And it is really silent, with less than 45dB.

Universal head

Speed of 17 RPM

Características

- Ø 45 mm
- Electronic end limit
- Obstacle detection and automatic reverse
- Manual end limits or automatic by pressure
- Multiple programmable positions
- Moisture resistant surface
- Detector sensors for number of turns

- IP65 extractable **EASY CONNECT®** connector to easily replace the motor
